

STREAMER UNTIL

Chat Bark Sheet · 265 authored lines · firststef

Every line the simulated chat speaks, grouped by phase and trigger. **Trigger** is the in-world event. **Viewers** is the effect on the viewership meter (the lifeline that also draws the monster). Template tokens are kept verbatim: **{emoji:category}[min-max]** pulls random emoji, **{prevMessageUser}** names another viewer.

TRIGGER	GAMEPLAY CONTEXT	INTENT	VIEWERS	BARK LINE
