Session 02: Locations & Buildings

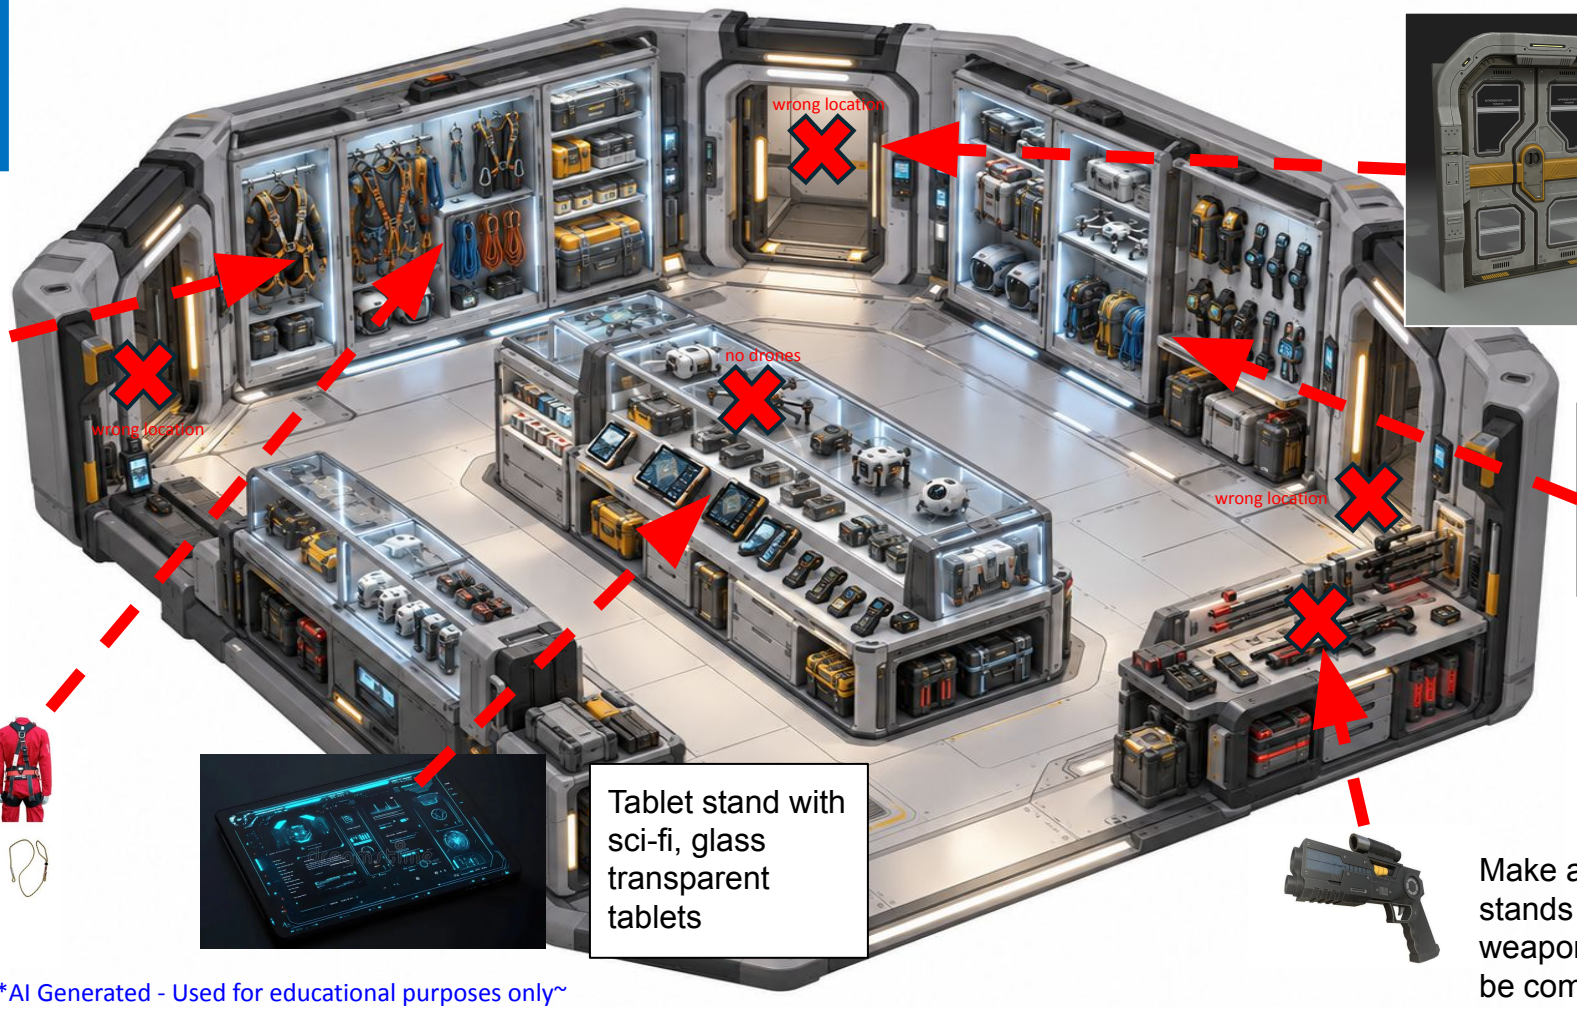

Narrative Design Boot Camp

Stefan Petrovici – Student Worksheet

BUILDING NAME: Engineering Room
BUILDING DESCRIPTION: Weapon / Tool room (INTERIOR)
LOCATION: Inside any standard ship

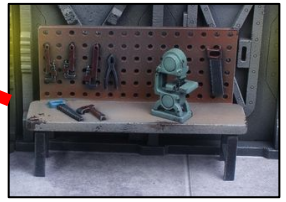

Space suits are displayed in the racks

Doors must be in the center of the walls, not on the corners

Tool bench on this wall, keep the helmets

Some suits are already equipped with grappling gear, its looks like climbing harnesses, also the gears is seen on this wall separately

Tablet stand with sci-fi, glass transparent tablets

Make a space weapon stands but not rifles, weapons in space must be compact and small

*AI Generated - Used for educational purposes only~

NPCs (enemies, neutral, or allies)

- Tools Engineer: an npc that deals with tools and equipment for the crew members

LEVEL ART IMPORTANT DETAILS

- The room should have a weapon bench, a tool bench with tools
- The image has too many items and details, keep just the main idea of each rack and wall and only implement those, focus on instructed items. Also you can fill up space with storage boxes, as you can see.
- Cabinets have glass doors to prevent items scattering on ship quakes

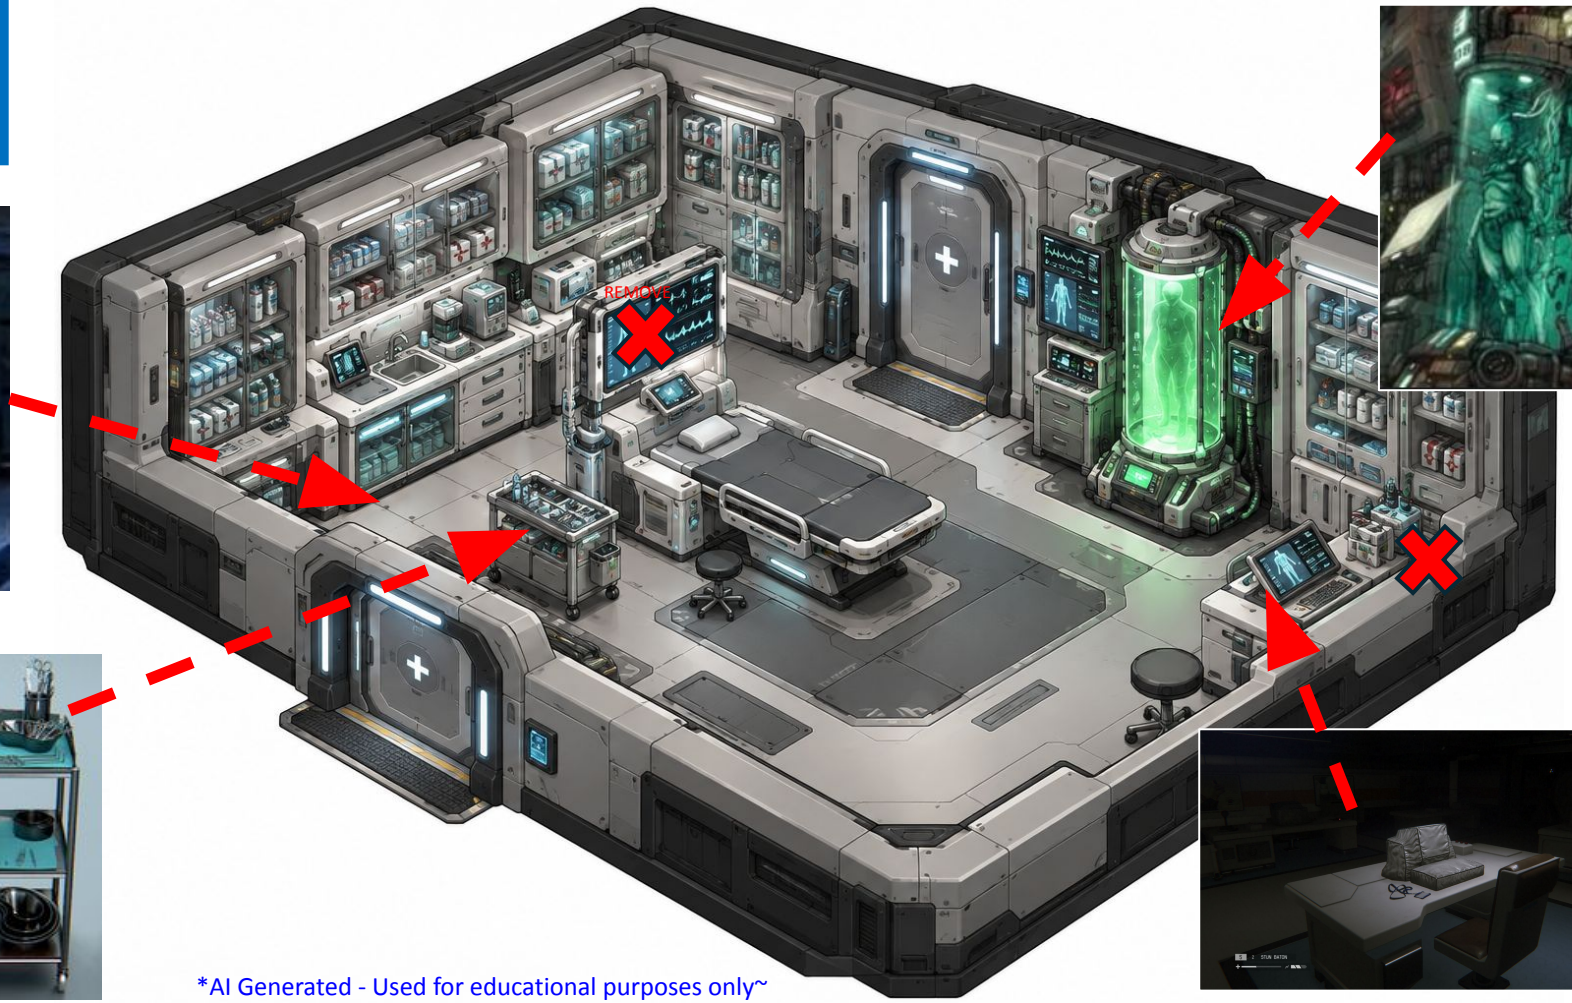

GAMEPLAY USAGE

- Weapon upgrade
- If players don't start with some tools, they can find some of them in this room, depending if they were spawned or not

BUILDING NAME: Infirmary Room
BUILDING DESCRIPTION: Healing Room (INTERIOR)
LOCATION: Inside any standard ship

We need an IV stand in the room

Green vat can be used to respawn players

Medical tray, 3 levels, all of the levels have a glass cover on them, to prevent knives falling all around when gravity inverts or ship is attacked

Put a normal desk here with paperwork and a computer

*AI Generated - Used for educational purposes only~

NPCs (enemies, neutral, or allies)

- Ship Nurse: an npc that can stabilize/heal players

LEVEL ART IMPORTANT DETAILS

- Make sure all cabinets, most tiny tools, surfaces have a protection like a glass cover or glass door to prevent items scattering all over

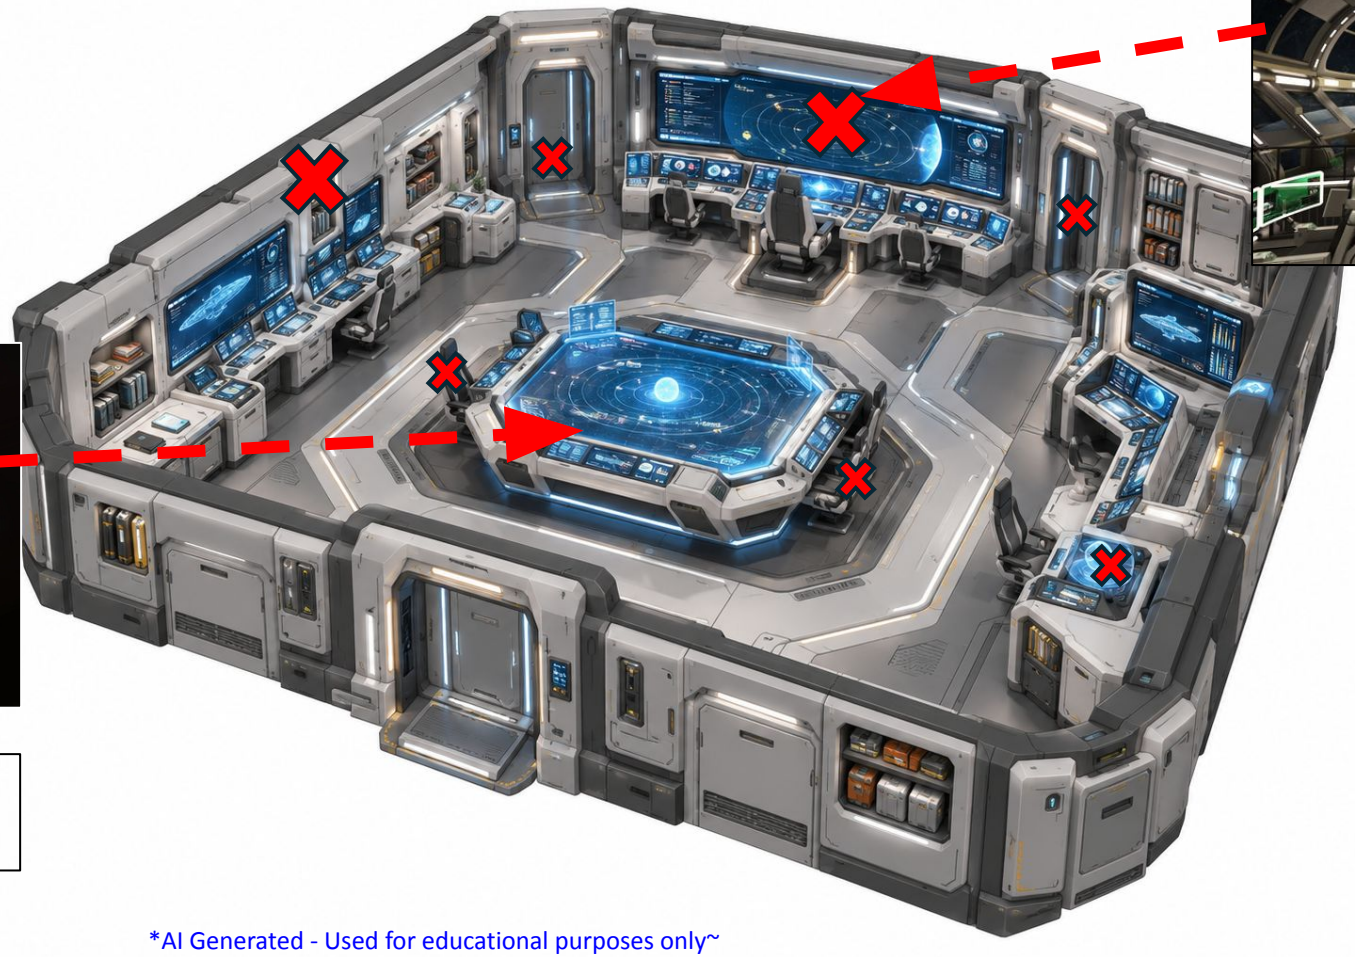

GAMEPLAY USAGE

- Player can come to this location to look for healing items and if one of the players die, they can clone that player here and he can play again.

BUILDING NAME: Command Room
BUILDING DESCRIPTION: Information room (INTERIOR)
LOCATION: Inside any standard ship

Make the hologram map circular, no seats around it

Windows that see to the outside of the ship all around the command center, don't put screens over the window, move the seats lower instead, and the screens under the windows

*AI Generated - Used for educational purposes only~

NPCs (enemies, neutral, or allies)

- Ship captain: knows all the details of the current in-progress mission, has a pretty good idea what the damaged zones are and hints on what started the crysis

LEVEL ART IMPORTANT DETAILS

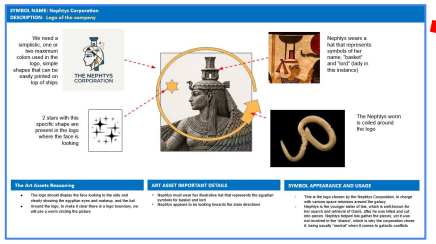

- Only one entry point, the door at the bottom

GAMEPLAY USAGE

- This location can be used to check the state of the other ship systems
- The ship AI system is accessible from this room

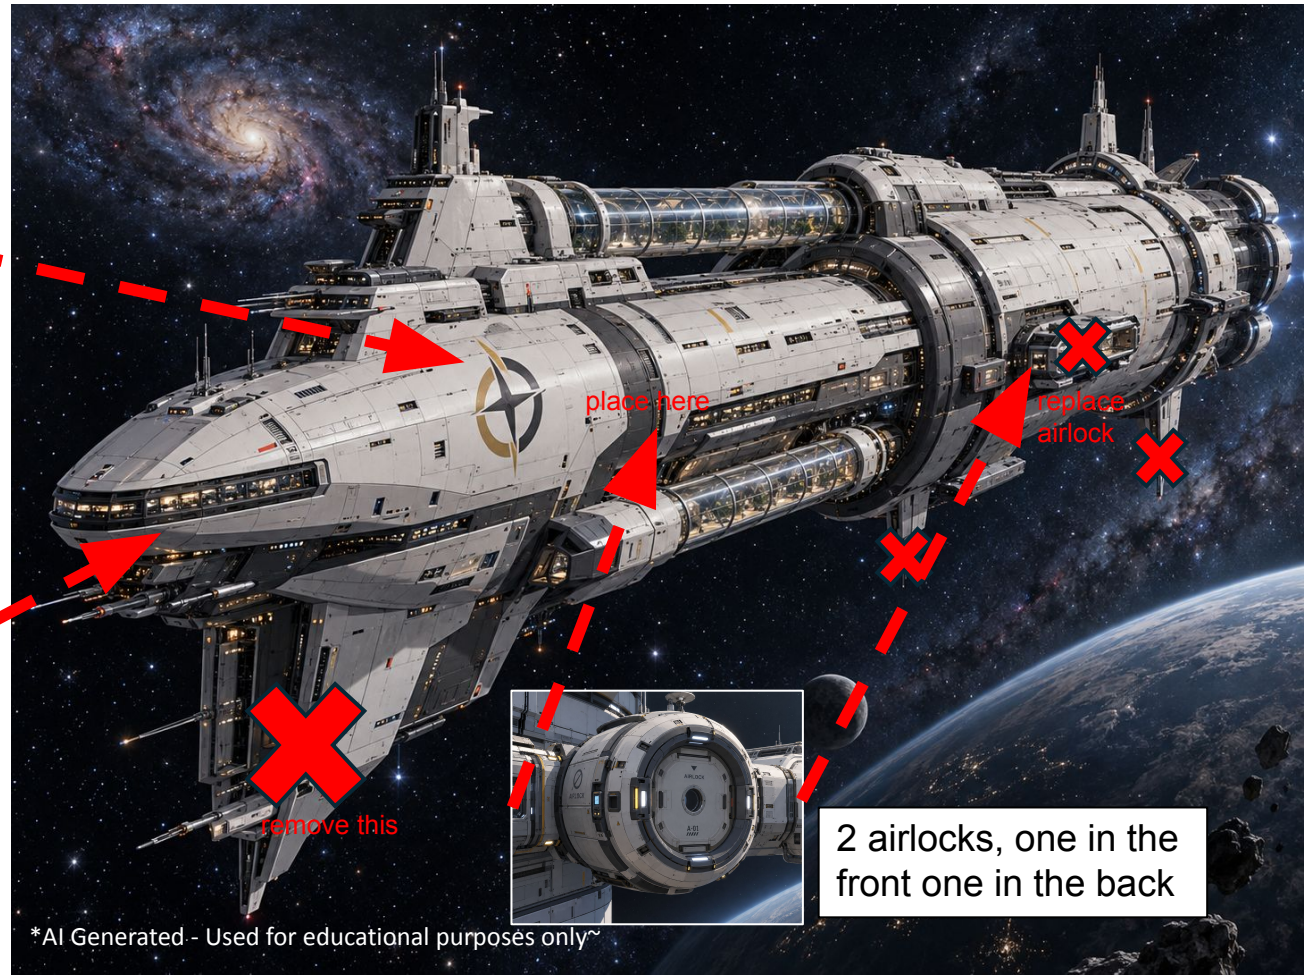

BUILDING NAME: Standard Ship
BUILDING DESCRIPTION: Standard Ship EXTERIOR
LOCATION: N/A (Vehicle)

Nephtys Corporation logo (next page)

Big open windows into the ship command room

NPCs (enemies, neutral, or allies)

- None, exterior

LEVEL ART IMPORTANT DETAILS

- 3 transparent transport tubes are connecting front of the ship to the back
- Look at the interior to match the sizes also

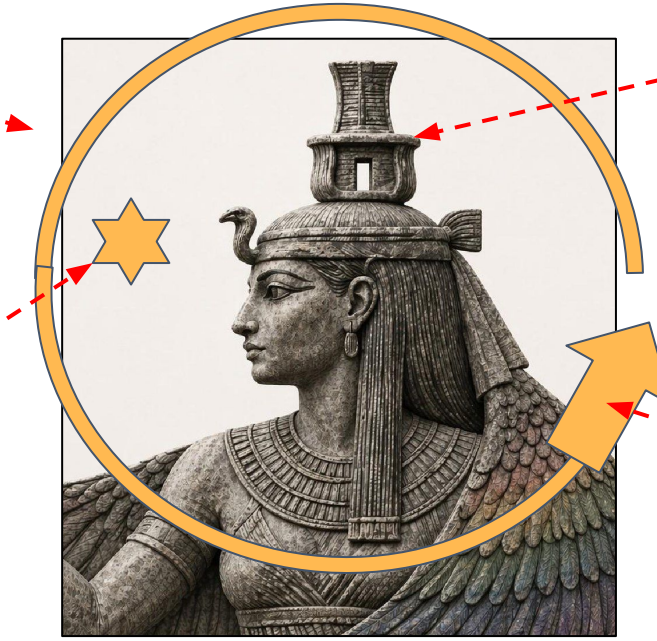

GAMEPLAY USAGE

- The standard ship players will board and try to salvage from

SYMBOL NAME: Nephtys Corporation
DESCRIPTION: Logo of the company

We need a simplistic, one or two maximum colors used in the logo, simple shapes that can be easily printed on top of ships

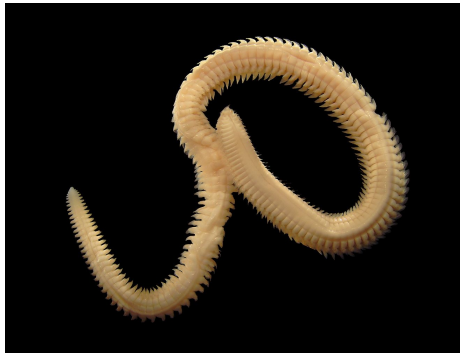

Nephtys wears a hat that represents symbols of her name, “basket” and “lord” (lady in this instance)

2 stars with this specific shape are present in the logo where the face is looking

The Nephtys worm is coiled around the logo

The Art Assets Reasoning

- The logo should display the face looking to the side and clearly showing the egyptian eyes and makeup, and the hat
- Around the logo, to make it clear there is a logo boundary, we will use a worm circling the picture

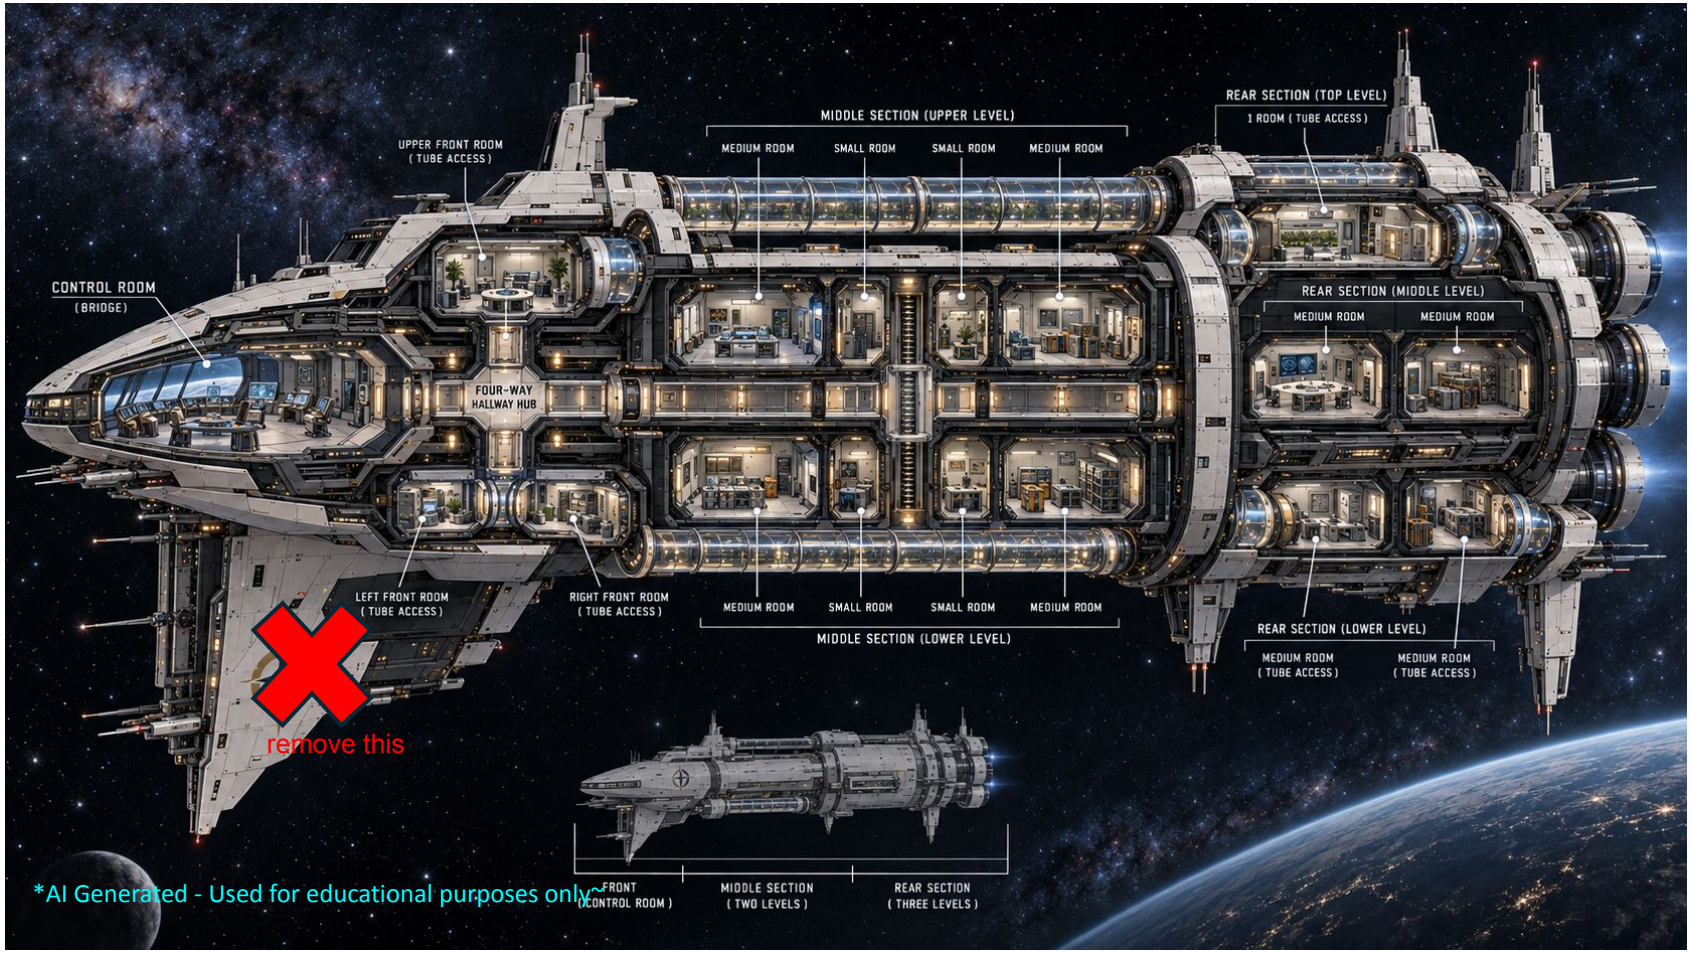

ART ASSET IMPORTANT DETAILS

- Nephtys must wear her illustrative hat that represents the egyptian symbols for basket and lord
- Nephtys appears to be looking towards the stars directions

SYMBOL APPEARANCE AND USAGE

- This is the logo chosen by the Nephtys Corporation, in charge with various space missions around the galaxy.
- Nephtys is the younger sister of Isis, which is well-known for her search and retrieval of Osiris, after he was killed and cut into pieces. Nephtys helped Isis gather the pieces, yet it was not involved in the “drama”, which is why the corporation chose it, being usually “neutral” when it comes to galactic conflicts

BUILDING NAME: Standard ship Layout (INTERIOR)
BUILDING DESCRIPTION: Internal ship layout (for reference for exterior)
LOCATION: N/A (Vehicle)

NPCs (enemies, neutral, or allies)

- N/A

LEVEL ART IMPORTANT DETAILS

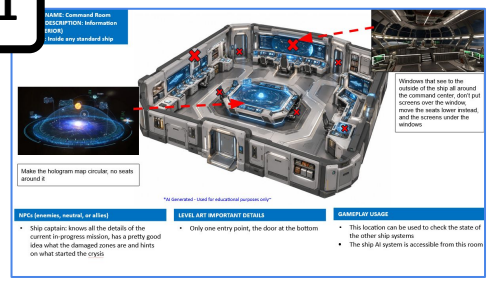

- The ship has 4 areas:
- 1) command room
- 2) hall area, 1 room on top, hallway, 2 rooms down
- 3) civic area - 4 rooms on 2 levels
- 4) technical area - 3 levels: 1,2,2 rooms

GAMEPLAY USAGE

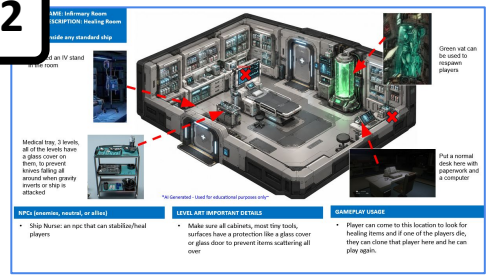

- Ship layout, rooms presented before (Armory, Infirmary) are randomly placed in one of these location spaces
- Other rooms (living quarters, engine room, cantine, etc.) will be added to complete the entire lineup of rooms

LOCATION NAME: Standard ship Interior
LOCATION DESCRIPTION: A composit of all the rooms

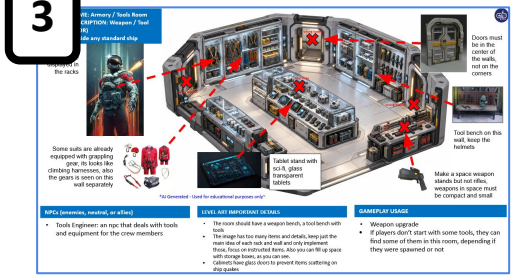

1

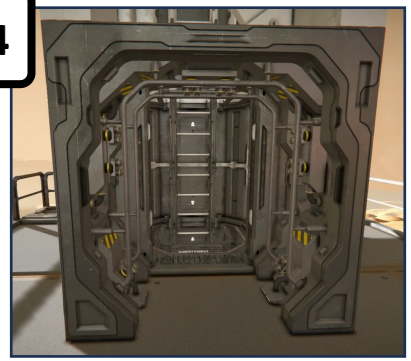

2

3

4

KEY SITES IN MISSION LOCATION

1. Command Room
2. Infirmary Room
3. Engineering Room
4. Ladder Shaft halls (used to travel between the rooms)

LEVEL ART IMPORTANT DETAILS

- Advanced technology sci-fi, clean, simple aspect
- Rooms must have same height and 2)3) must have the same size, while 1) is double the width size

LOCATION THEMATIC & APPEARANCE

- The ship is a special mission vessel, harboring some sort of secret within it about the mission

LOCATION FUNCTION IN THE WORLD

- Players need to uncover what went wrong in the mission, and extract what's left valuable

BACKSTORY (in World Lore)

- There are a number of different ways the mission went wrong:
- - alien escape and massacre
- - rogue robot AI
- - mind-controlling virus, etc.

NPCs (enemies, neutral, allies)

- Ship crew (captain, engineer, medic, etc.)
- Civilians (researchers, linguists, psychologists, etc.)
- Robots

GAMEPLAY USAGE

- The gameplay is mostly scavenging and researching ships such as this one here, so it is the main area of the game
